PROFESSIONAL SUMMARY

Junior UX Designer with a B.Com background, applying user-centered design and interaction design principles to product experiences. Currently designing interfaces at LocalHi while building end-to-end Figma case studies across fintech, healthtech, food delivery, B2B SaaS, and branding — spanning user research, wireframing, high-fidelity mockups, and interactive prototypes through to design specifications and developer handoff. Skilled in design systems, component libraries, responsive design, and WCAG 2.1 accessibility, with a track record of cross-functional collaboration with engineers and product managers. Seeking a UX Designer role where design-pattern thinking and problem-solving can shape intuitive, industry-leading products.

WORK EXPERIENCE

User Interface Designer | LocalHi Mar 2026 – Present · 7 months · Remote, India

- Applied user-centered design methods to craft interfaces for mobile and web applications in Figma, translating user insights and business needs into design direction.
- Created wireframes, high-fidelity mockups, and interactive prototypes to guide design and development decisions and communicate design approach to cross-functional partners.
- Built reusable component libraries and design systems, defining design patterns and specifications to keep implementation-ready designs consistent and scalable.
- Collaborated closely with UX designers and developers, contributing to design direction and delivering pixel-perfect, handoff-ready designs.
- Designed responsive, mobile-first layouts optimized across multiple screen sizes and breakpoints.
- Identified design solutions to user and product problems by applying UI/UX best practices and accessibility guidelines (WCAG 2.1).

SKILLS & TOOLS

Design Tools: Figma (Auto Layout, Components, Variants, Prototyping, Inspect/Handoff), Canva, FigJam, Miro

UX Skills: User Research, Wireframing, User Flows, Persona Creation, Journey Mapping, Heuristic Evaluation, Information Architecture, Design Thinking, Card Sorting, Usability Testing, Competitive Analysis

UI / Product Design Skills: Interaction Design, Product Design, Responsive Design, Mobile-First, Component Libraries, Design Systems, Design Patterns, Style Guides, Typography, Color Theory, Visual Hierarchy, Visual Design, WCAG 2.1 Accessibility, Design Specifications

SELECTED PROJECTS

Full case studies: ummehani-ux.github.io/umme-hanii-portfolio

DealHub AI — B2B SaaS Website Redesign Figma | Responsive Web | Heuristic Audit, Competitive Analysis, Design Systems

End-to-end redesign of a B2B “quote-to-revenue” SaaS site to fix weak visual hierarchy and inconsistent UI.

- Conducted heuristic audit and competitive analysis, restructuring information architecture across 5 responsive breakpoints
- Built a reusable Figma component library (buttons, cards, feature tiles) using Auto Layout and Variants for scalable consistency
- Delivered a wireframe-to-prototype system that lets new content slot in without breaking layout

BigBite — Food Delivery App Figma | Mobile UX/UI | Personas, User Flows, Prototyping, Usability Testing

Mobile-first ordering app designed to resolve checkout drop-off and streamline discovery-to-checkout.

- Mapped 3 personas and 4 end-to-end user flows across 18+ screens, from wireframes to high-fidelity prototype
- Designed persistent bottom navigation and a single-screen checkout to eliminate drop-off from unclear flow
- Prioritized rating, calories, and prep time on item-detail screens to support key user decisions

Digital Agency — Landing Page Figma | Web | Visual Design, Typography, Responsive Handoff

Conversion-focused landing page built for a first-time visitor to scan and act within seconds.

- Applied an F-pattern layout and above-the-fold CTA strategy with one repeated call-to-action throughout
- Designed a masonry-style project grid with consistent “View Project” affordances for scannability
- Used typographic contrast to guide visual hierarchy instead of heavy color or boxes

UPLYST — Brand Identity Figma | Visual Identity | Logo Design, Typography, Color Theory

Visual identity system for UPLYST, built for a clear, modern, and memorable brand presence.

- Designed a distinctive logo, typography, color palette, and supporting visual elements as a cohesive system
- Maintained consistency across logo variations and brand applications for stronger recognizability

Squarespace — Website Redesign Figma | Web | Visual Hierarchy, Typography, UX/UI Design

Website redesign focused on clearer navigation and stronger content discoverability.

- Redesigned layouts and typography to strengthen visual hierarchy and navigation clarity
- Restructured content sections into a more focused, engaging user journey
- Delivered a cleaner, more structured browsing experience end-to-end
